

GUIDELINES FOR SYSCO SERIES

Stay home if you feel sick or have been exposed to someone suspected to be infected with COVID 19.

- Groups should not congregate in parking lots or on docks before or after races. Once sailing is done, pack up your boat and go home.
- Use face coverings in public areas including docks, bathrooms and parking lots.
- Practice physical distancing between you and others not in your household.
- Boats should sail/race with their own household members rather than with those in their extended social circles, or all crew must wear facemasks at all times.
- Because Race Committee teams and boats will have limited crew, all participants must use PFDs during sailing activities.
- Sailboats sailing a similar course should take a conservative tactic to avoid any close quarter maneuvers to minimize collisions or prolonged entanglement.
- All boats will carry an operational VHF radio.
- Have hand sanitizer onboard your vessel and use when appropriate.
- Use your own personal equipment such as life jackets, do not share equipment, water, food, etc.
- Sanitize and disinfect commonly touched surfaces or tools (winch handle, tillers, etc.) on boats after the race.
